Objective

Hello, I'm a front-end web developer specialized in designing and developing user interfaces and building dynamic websites. I am constantly seeking a web developer position in a stable company, where I can utilize my experience and education to help the company achieve and exceed its goals.

Experience

12/2024 – 1/2025 **Front-end web developer, React.js**

Wazen

- Front-end web developer on the Wazin platform An integrated platform that provides smart digital solutions for payments, shipping, and inventory management, to create central online stores for sellers, while building many diverse themes. Integrated management system.

1/2025 – present **Front-end web developer, React.js**

Value Business Planning

- I work as a front-end developer using React.js at Value Business Planning, where I participate in the development and improvement of ERP (Enterprise Resource Planning) systems. I focus on building interactive and flexible user interfaces that enhance user experience and efficiently meet customer needs, while adhering to best coding practices and the latest web development technologies.

Education

- **Ruote Academy Diploma in Information Technology (Front-end Web Development)** The course covers front-end tools: JavaScript, AJAX, JSON, and React.Js. development of a new highly-responsive, web-based user interface. Develop a flexible and well-structured project architecture and the APIs to support it. Translate designs, wireframes, and business requirements into solutions using high-quality codes. 7/2022

Technical Skills

Front-end developer
