

Abdulrahman Ahmed Zaghloul

Frontend Developer – React.js | Next.js

Cairo, Egypt | abdozaghloul990@gmail.com | +201142631113 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Junior Frontend Developer specialized in React.js and Next.js, with hands-on experience building business websites and ERP systems. Experienced in building reusable UI components, integrating RESTful APIs, optimizing performance using Next.js features (SSR/ISR), and managing complex state with React Query. Passionate about clean code, scalable architecture, and creating user-friendly interfaces.

EDUCATION

Bachelor's Degree in Management Information Systems

HICMIS | 2021 – 2025

WORK EXPERIENCE

Frontend Developer – React.js & Next.js | ATAM DIGITAL SOLUTION 8\ 2024 – Present (Hybrid) •

Developed and maintained complex ERP systems using Next.js and React.js, focusing on high-performance and scalable architecture.

- Built dynamic and interactive dashboards integrated with RESTful APIs, ensuring seamless data flow and real-time updates.
- Optimized application performance by leveraging Next.js features (SSR/ISR) and managing complex states with React Query.

Frontend Developer – React.js | Value Business Planning Jan 2025 – Aug 2025 (On Site) • Worked as a frontend developer using React.js, participating in the development and improvement of ERP (Enterprise Resource Planning) systems.

- Built interactive and flexible user interfaces that enhance user experience and efficiently meet customer needs.
- Adhered to best coding practices and the latest web development technologies.

PROJECTS

Muajarh – Real Estate Rental Dashboard (Saudi Arabia)

Tech: React.js, TypeScript

- Real estate rental website serving the Saudi Arabian market.
- Implemented third-party integrations, enhanced validation logic, and optimized API handling for a production rental platform.

ICBS – School Management System

Tech: React.js

- Worked on frontend structure and system stabilization for a web-based school management platform.
- Improved validation, data flow handling, and overall user experience and system performance.

Taq Admin – Dashboard for the Ministry of Energy (Saudi Arabia)

Tech: Next.js, Form Handling

Government-grade admin dashboard for the Ministry of Energy. Full RBAC, approval workflows, RFQ management, and geographic management via Leaflet maps.

topbrands– Nationwide FMCG Distribution (Syria)

Tech: React.js

Multi-brand retail platform for the Syrian market with bilingual Arabic/English support, product catalog management, and structured browsing.

COURSES & INTERNSHIPS

Route Academy – Diploma in Information Technology (Frontend Web Development) | *Jul 2024* •

Covered front-end tools: JavaScript, AJAX, JSON, and React.js.

- Developed highly-responsive, web-based user interfaces with flexible and well-structured project architecture.
- Translated designs, wireframes, and business requirements into solutions using high-quality code.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript
